Declarations

Funding. This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Competing interests. The author has no relevant financial or non-financial interests to disclose.

Ethics approval and consent to participate. Not applicable. The study uses publicly available source-code corpora and involves no human participants.

Consent for publication. Not applicable.

Data availability. The study uses the public corpora BigVul, DiverseVul and Devign, accessed through public mirrors named in the manuscript. The sampled function identifiers, the per-fold held-out predictions of every system, and the annotation sheets are in the repository below.

Code availability. All code and the scripts that regenerate every table, figure and number are available at https://github.com/vinhqdang/vulmorph-fed.

Author contribution. Single author.

Use of large language models. Language models were used as the two blind annotators and the adjudicator in the validation of the operation labelling (manuscript Section 4.7). Language-model assistants also helped with writing code and drafting text; the author reviewed and edited all content and takes full responsibility for it.
